

# Summer Learning Camp 2023

Students hard at work learning about solar powered vehicles and utilizing comprehension strategies.

After reading the true story of Bob the gorilla who was kept in a shopping mall, students designed and built an enclosure for an endangered animal that would meet all of their needs. Students worked collaboratively and had to listen to each other's ideas to execute this project.

# Summer Learning Camp 2023

During rotations students practiced grammar and reading skills by playing games and working on the Osmo. Students are working on syllables in these pictures.

# Summer Learning Camp 2023

Students hard at work learning how to code!

Another design/ engineering challenge. These students are using their grids to create a base using their math, language and problem solving skills.
